

Apache Software Foundation Distribution Directory

The directories linked below contain current software releases from the Apache Software Foundation projects. Older non-recommended releases can be found on our <http://archive.apache.org/dist/>.

To find the right download for a particular project, you should start at the project's own webpage or on our <http://projects.apache.org/indexes/quick.html> rather than browsing the links below.

Please do not download from apache.org! If you are currently at apache.org and would like to browse, please visit <http://www.apache.org/dyn/closer.cgi> instead.
